

Atkinson Design is currently looking to fill the following position for our client in their Vancouver office....

Position: Project Manager - Bulk Materials Handling

Location: British Columbia - Vancouver/Lower Mainland - Vancouver

Role: (Full time)

Our client is a leading engineering consultant in transportation, infrastructure, power, petroleum, industrial process, manufacturing and general building. As a result of their continued success in Canada and abroad we are looking for experienced designers to bring our exciting Ports, Marine and Bridge projects to life. This position will be based in beautiful Vancouver, which is consistently rated as one of the most livable cities in the world.

Responsibilities:

The Project Manager, Bulk Materials Handling will provide timely and efficient coordination and delivery of projects varying in size and complexity in local, national and international locations. The ideal candidate will have demonstrated leadership skills and the technical expertise needed to achieve quality outcomes while ensuring client needs and expectations are always met.

Qualifications:

- 7 years' experience managing multi-functional teams on a variety of bulk materials handling projects.
- This position will appeal to professionals with project management experience in cost-plus and/or EPC environments. MUST have mining experience.
- Specific design experience for Bulk Materials Handling equipment (conveyors up to 1200tph, stacker reclaimers, chutes, buckets etc.) for the mining industry dealing with HEAVY dry materials like iron ore, coal, copper concentrate.
- A university degree in Engineering or Applied Sciences as well as be registered, or eligibility for registration with APEGBC
- 7 years' project management experience with an engineering consulting firm or other large organization.
- Fluency in another language, preferably either Spanish or Portuguese is considered an asset.

Optimum Skillsets and Competencies

- Good commercial sense and experience expanding and developing business with new and existing clients.
- A highly motivated, confident team oriented professional, with excellent verbal and written communication skills - experience preparing proposals and delivering presentations PMI certification
- A proven track record managing multiple projects simultaneously or a single project of major size and scope.
- Strong hands-on aptitude with the ability to work well under pressure
- A strong desire to exceed internal and external customer expectations
- Drives improvement efforts based on delivering value to customers and stakeholders
- A strong background in engineering technology with an emphasis on heavy industrial projects.

Interested candidates should send their resumes to wendy.atkinson@gadp.com. Please indicate in **Project Manager - Bulk Materials Handling** the subject line.
